Summary

Results-driven Computer Science undergraduate specializing in UI/UX Design and Front-End Development. Proficient in Figma, Framer, and Adobe Photoshop with hands-on experience in wireframing, prototyping, and usability testing. Passionate about crafting intuitive, user-centered digital experiences and translating design concepts into responsive interfaces. A collaborative team player and proven leader, eager to contribute to innovative startups and dynamic MNCs.

Education

SRM Institute of Science and Technology, Tiruchirappalli

2022 – 2026

- B.Tech. in Computer Science and Engineering
- CGPA: 7.93

Projects

Bloom — Luxury Plant & Home Décor Website

[Visit Website](#)

- Designed and developed a premium botanical lifestyle website blending luxury home décor with indoor plant aesthetics, from concept to deployment
- Built fully responsive desktop and mobile experiences with strong visual hierarchy, refined typography, and consistent brand identity
- Crafted key experiences including product showcases, lifestyle galleries, category exploration, testimonials, and newsletter sign-up flows
- Implemented modern interactions and scroll-based animations using HTML, CSS, JavaScript, and GSAP for a polished, premium feel
- Deployed and maintained the live site using Git, GitHub, and Vercel, managing the complete design-to-production pipeline

Local Play — Mobile App Concept

[View on Behance](#)

- Identified a real-world problem of solo players struggling to find local sports matches, and designed a mobile solution enabling users to discover and join nearby offline games across football, cricket, badminton, and more
- Designed core features including nearby game discovery, player profiles, ratings, turf coordination, and in-app chat to create a seamless end-to-end sports community experience
- Developed user flows and high-fidelity wireframes simplifying team formation, match scheduling, and turf booking for both solo players and organized groups

Zudio App Concept — UI/UX Design

[View on Behance](#)

- Designed an end-to-end shopping app concept in Figma, covering user research, information architecture, and high-fidelity UI screens
- Built a scalable design system with reusable components, typography, and color tokens ensuring visual consistency across 20+ screens
- Created interactive prototypes simulating real user flows including product discovery, filtering, and checkout experience

Heuristic Evaluation of Apple Music

[View on Behance](#)

- Conducted an in-depth usability audit of Apple Music using Nielsen's 10 Heuristics, identifying 15+ UX issues across core user flows
- Developed high-fidelity redesign mockups addressing critical pain points, improving visual hierarchy and navigational clarity
- Delivered a structured UX case study with severity-rated findings and actionable design recommendations

Technical Skills

UI/UX Tools: Figma, Framer, Adobe Photoshop

Design Skills: Wireframing, Prototyping, Usability Testing, Heuristic Evaluation

Programming: Python

Web Technologies: HTML, CSS, JavaScript, GSAP, Responsive Web Design

Tools & Platforms: Git, GitHub, Vercel

Certifications

UI/UX Design: Create High-Fidelity Designs and Prototypes in Figma — Google

Design: Graphic Design — Adobe

Programming: Python — HackerRank SQL — HackerRank

Web Development: HTML, CSS, JavaScript for Beginners — Udemy

Additional Information

Languages: English (Professional), Tamil (Native), French (Basic)

Extra-Curricular: Footballer & Team Captain — SRM Institute of Science and Technology

Workshops: IoT Workshop — Top Engineers, IIT Madras Research Park
